70%	98%	6	50%
MANUAL EFFORT REDUCED	CHATBOT ACCURACY	PRODUCTS DELIVERED	APPROVAL TIME CUT

PROFESSIONAL SUMMARY

Business Analyst with a rare combination of domain depth and AI delivery experience — specialising in supply chain automation across the full product lifecycle, from requirements to live deployment. Built and shipped 6 tools that reduced manual procurement effort by 70%, cut approval cycles by 50%, and achieved 98% chatbot query resolution in production. Fluent across the full stack of BA work: stakeholder workshops, functional specification, AI governance, and hands-on automation with tools like n8n.

CORE COMPETENCIES

AI Product Design

Conversational AI (Chatbots) · Prompt Engineering · Agentic Workflow Design · Intent & Entity Mapping · Fallback Logic · AI Governance · Human-in-the-Loop

Business Analysis

Requirement Engineering (BRD/FRD) · User Stories · Gap Analysis · UAT Coordination · Persona Mapping · Stakeholder Mgmt · Agile/Scrum

Supply Chain Domain

RFQ Management · Procurement Automation · Demand Planning · MPN/CPN Reconciliation · Supplier Risk · Cost Analysis · Inventory & Logistics · eProcurement

Technical Stack

SQL · Python · API Integration · n8n (Low-code) · JIRA · Tableau · Lucidchart · Eraser.io · Linear Regression

PROFESSIONAL EXPERIENCE

Business Analyst — AI & Automation

2024 – Present

InESS Global Solutions, Chennai

- AI Feature Architecture: Owned functional specification for AI-augmented supply chain tools — defining risk scoring logic, predictive sourcing rules, and edge-case handling across 3 live products.
- Conversational AI Design: Designed end-to-end chatbot flows (intent taxonomy, entity recognition, fallback protocols) deployed in production; achieved 98% query resolution accuracy.
- Workflow Automation: Built n8n pipelines that eliminated manual handoffs between procurement and finance, cutting process TAT by 40% and removing a class of data-entry errors entirely.
- AI Governance: Created hallucination detection and mitigation frameworks for AI-generated pricing and inventory forecasts, ensuring outputs meet audit and compliance standards.

Career Break *2019 – 2023*

Family Caregiving Responsibility

Family caregiving responsibility. Concurrently built foundational Python and data skills.

Junior Associate — QA & Testing

2019

Amazon, Chennai

- Executed end-to-end functional and UI testing for the Amazon Audible platform across web and mobile surfaces, covering regression, smoke, and exploratory test cycles.
- Identified and documented critical pre-release defects, contributing to zero P0 bugs at global launch — a key quality gate for a platform serving millions of users.

- Developed structured test cases from product requirements, building a reusable test library that reduced future regression cycle time.

KEY PROJECTS

Master Pricing Automation Tool (MPAT) — Live & In Use

Arista Networks

- Owned end-to-end product design of an intelligent multi-supplier pricing engine — defining allocation split rules, cost signal weighting, and incomplete-data fallback logic.
- Led UAT with zero defects raised. Outcome: 30% faster sourcing decisions; now used daily by commodity managers.

Spares Automation Tool — Live & In Use

Arista Networks

- Designed a Python-based RFQ automation system across three independent procurement modules, authoring all FRDs and rule-based validation logic.
- Outcome: 40% reduction in TAT and zero manual processing errors since go-live.

SaaS RFQ Management Platform — Pre-Launch

InESS Solutions

- Designed a multi-tenant SaaS platform end-to-end: OTP onboarding, supplier portal, buyer dashboard, and AI-driven KPI reporting, with role-based access for Admin, Supplier, and Buyer personas.
- Outcome: Projected 50% reduction in approval cycle time; UAT completed with zero defects.

Cost Roadmap (CRM) Forecasting Tool — POC Complete

InESS Solutions

- Designed an AI-driven cost forecasting POC using linear regression on 3 years of historical pricing data, enabling proactive sourcing decisions before market price shifts.
- Defined input variables, confidence-interval outputs, and a full functional specification ready for engineering handoff.

Live Tool Maintenance & Continuous Improvement — Ongoing

Arista Networks

- Own post-launch support for MPAT and Spares tools — triaging change requests, refining business rules, and assisting commodity managers with structured quote analysis.

EDUCATION & CERTIFICATIONS

B.E. in Mechatronics Engineering — *2017*

SNS College of Technology, Coimbatore

Prompt Engineering — Coursera / Vanderbilt University · 2025

Python Programming with AI — DeepLearning.AI · 2025

AI For Everyone — Coursera · 2025

n8n Automation Workflow — n8n Official · 2024
